

WITH FLOE'S MODULAR DESIGN, CREATE YOUR PERFECT DOCK SYSTEM USING THESE STANDARD COMPONENTS

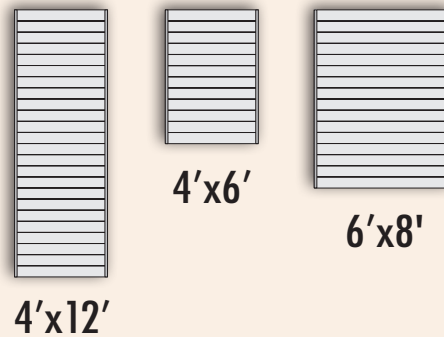

DOCK SECTIONS/SUNDECKS

These sections can be used for going straight out as well as making "L" shapes, slips or sundecks. Placing two 4' x 12' or 4' x 16' sections side by side gives you an excellent option for a double-wide sundeck that can be handled as two independent sections during installation and removal.

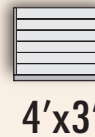

SHORE-END RAMPS

Adjustable, pivoting shore-end ramps give you the ultimate approach and additional length for less money.

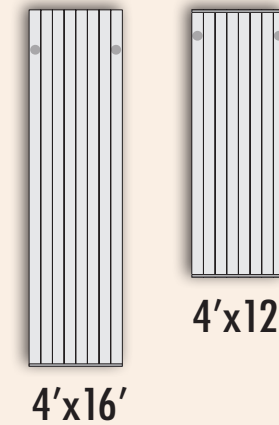

3'SHORE-END TRANSITION RAMP

When all you need is that little extra. Our 3' Transition Ramp is perfect for when you have a small transition or when working with a limited shoreline.

DOCK SHOREWAY

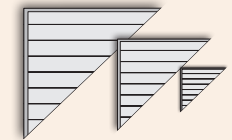

Provides the flexibility of a shore end ramp with the look of a dock section. Can be used with or without wheel kits.

Also available: 5'x12', 5'x16', 6'x12' & 6'x16'

WEDGES

Make that perfect corner while adding safety and beauty to your system. Wedges are available in 2', 4' and 6'.

WHEEL KIT WEIGHTS/PAIR

X-SHALLOW	12 lbs
SHALLOW	16 lbs

X DEEP	44 lbs
XX DEEP	52 lbs

WHEEL WT: 10 lbs each

SHOREWAY WEIGHTS

4'x12'	152 lbs
4'x16'	197 lbs
6'x12'	218 lbs
6'x16'	288 lbs

SHORE END RAMP WEIGHTS

4'x6'	60 lbs
4'x12'	134 lbs
6'x8'	118 lbs
4'x3'	36 lbs

SUNDECKS

A 4' x 8' sundeck can be used on the side of a straight section to create an 8' x 8' sundeck. An 8' x 8' section used on the side of a straight section creates an 8' x 12' sundeck. 8' x 12' and 8' x 16' sections can be used either at the end of a straight section or off to the side to create a sundeck.
